

A MAXCESS BRAND

In the Fife D-MAXE system the controller and the operator interface are separate modular components, making the D-MAXE easy to integrate, especially in systems with limited space, saving on installation and setup time.

Either integrated into the guide structure, or remotely mounted, the Fife D-MAXE provides the highest level of guiding accuracy, the most flexible customization thanks to its state-of-the-art software, Ethernet based networking and up to three control loops, all packed into the smallest space requirements. The OI-TS Operator Interface makes the control of the guiding system easy and intuitive, thanks to the colored touch screen display.

General Specifications

D-MAXE CONTROLLER

Weight

D-MAXE 1, D-MAXE 2: 1 kg
D-MAXE 3: 1,2 kg

Mounting Options

integrated or wall mounted
(adapter bracket required)

Operating Conditions

Temperature: 0° - 60 °C,
Humidity: 10 % - 95 %, non-condensing

Power Consumption

Controller max. 130 W,
Motor drive max. 200 W, at 24 VDC
or max. 400 W at 48 VDC

Drives

available as single-, dual- or triple-
drive version
supporting all available Fife
actuators and hydraulic valves

Sensor Inputs

4 independent sensor channels

Built-In Networking

2 x Ethernet at 100 MBit / s for
Daisy Chain

Protection Class

IP 54

Parallel Port

featuring 6 inputs, 2 outputs, line
speed input

OI-TS OPERATOR INTERFACE

Weight

600 g (without mounting
accessories)

Mounting Options

Panel (-B) or Wall (-W) mount
(bracket required)

Dimensions

Wall mount:
128 x 105 x 38 mm
Panel mount:
128 x 105 x 33+5 mm

Operating Conditions

Temperature: 0° - 60 °C,
Humidity: 10 % - 95 %, non-condensing

Display

TFT Touchscreen-Display,
480 x 272 Pixel

Connector

M12 Plug, 4-pin, A-coded

Protection Class

IP 64

Key Features

- Compact, easy to integrate controller, even for very small guides
- Touch screen with user friendly operator interface
- Backward compatible with all existing Fife guiding systems
- D-MAXE Controller available in single-, dual-, and triple-drive configurations
- Networks (integrated): EtherNet/IP, Profinet IO, EtherCAT, Modbus/TCP, additional networks possible via the operator interface OI-N (e.g. Profibus DP, ControlNet)
- 2 built-in Ethernet ports for direct connection of multiple controllers (Daisy Chain)
- Durable construction for low maintenance and long-lasting reliability

D-MAXE CONTROLLER AND OPERATOR INTERFACES

D-MAXE CONTROLLER

- Available in single-, dual-, and triple-drive configuration
- Versions with dual- or triple-drive configurations suitable both for independent control loops and also for combinations of control loops with automatic sensor positioning
- Ideal upgrade to Fife CSP-01, CDP-01, DP-20, DP-30 and DP-20 Plus processors
- 24 .. 48 VDC power supply voltage
- Ethernet-based proprietary secured real-time communications (MaxNet)
- Industrial protection grade: IP 54
- Certification: UL, cUL, CE and UKCA

OI-TS OPERATOR INTERFACE

- Communicates directly to a D-MAXE controller
- Easy to read, backlit TFT touchscreen, resolution 480 x 272 pixels
- Icon and text based colored graphic user interface, intuitive and easy to use
- Freely selectable user language (16 languages available)
- Compact dimensions
- Suitable for panel- or wall-mount (bracket required)
- Protection Class IP 64

OI-N OPERATOR INTERFACE WITH INTEGRATED SWITCH

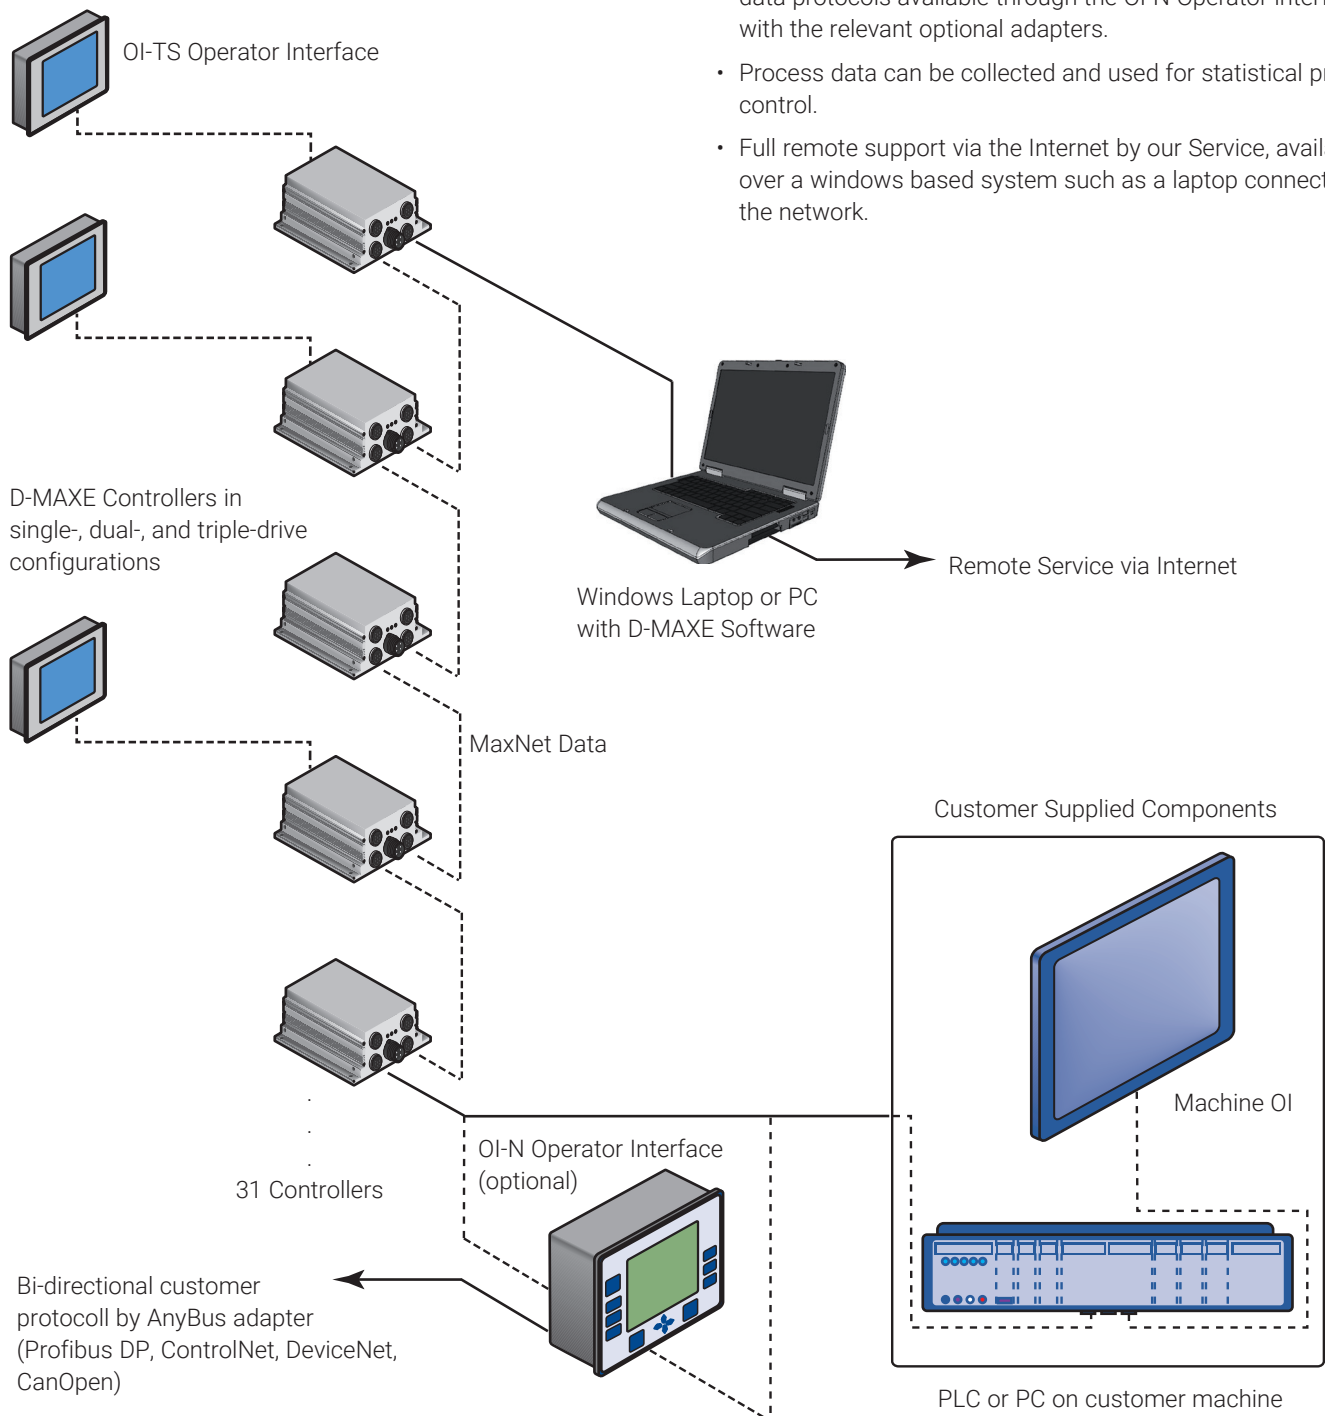

- Communicates directly with a D-MAXE controller
- 320 x 240 pixels QVGA Graphic LCD
- Graphical operator interface, based upon function keys, symbols and plain text
- Keypad featuring 6 Smart Function keys, 4 arrow keys for menu navigation, Page key, Enter key and Escape key.
- Panel mount with an IP-54 rating or wall mount with an IP-40 rating (bracket required).
- 5 - port Ethernet switch (100 MBit / s) for guide networking and /or communication uplink to further Operator Interface Panels
- Optional CompactCom port for communication with Programmable Logic Controllers, require AnyBus Adapter: Profibus DP, ControlNet, DeviceNet, CanOpen

D-MAXE NETWORK CAPABILITIES

EXTENDED NETWORKING POSSIBILITIES UNDER ETHERNET

- Each D-MAXE features an integrated 2-port Ethernet switch which facilitates daisy-chaining several D-MAXE's in series (with no additional hardware required), star configuration (using a switch or the OI-N control panel) or a combination of both.
- Easy networking of multiple D-MAXE controllers (up to 31), with real time communication without additional components, thanks to the integrated Ethernet hardware.
- Virtual-OI Windows Software available for full interfacing of the D-MAXE Network with machine PCs and Laptops for control and service purposes.
- Easy interfacing to any machine PLC or PC via Ethernet.
- Embedded Profinet IO (Siemens), Ethernet/IP (Rockwell), EtherCAT (Omron, Beckhoff) and Modbus/TCP protocols available as option.
- Multiple control points - One or more colour touch-screen panel OI-TS available in parallel to control all devices in the whole network.
- Profibus DP, ControlNet, DeviceNet, CanOpen and other field data protocols available through the OI-N Operator interface with the relevant optional adapters.
- Process data can be collected and used for statistical process control.
- Full remote support via the Internet by our Service, available over a windows based system such as a laptop connected to the network.
